

Cannabis in Adolescents Study

The purpose of this research is to better understand the effects of marijuana use on the endocannabinoid and endorphin systems in adolescents.

If you are interested in participating, please contact hinckley.lab@ucdenver.edu or scan the QR code below.

Inclusion Criteria:

- Age 14-21
- Use marijuana at least two days a week for the past month
- Not seeking treatment to reduce or stop your marijuana use
- Not currently using or taking certain types of medications or other illegal drugs in the past 90 days
- (Female participants) not pregnant or nursing
- Have access to an internet connected device and the ability to use Zoom

If you join the study, you will have a total of 12 study visits over about two months. Some of these visits will be held via Zoom and others at a clinic on the CU Anschutz Campus in Aurora. You will
