

Interested in using cannabis for back or spine pain?

The doctors at the University of Colorado Department of Orthopedics are conducting a research study to learn more about the use of oral cannabis for back or neck pain.

Inclusion Criteria:

To participate you must be in good overall health, be between 21-84 years old, and have chronic back or neck pain. You must also be willing to not use personal cannabis products while participating in the study.

Participation:

If you meet all study criteria, you will complete three separate treatments of 5 weeks each for a total of 22 weeks. Each treatment phase contains different study drug: oral cannabis with THC, oral cannabis with CBD and THC, and placebo.

The total time to complete the study will be about 6 months. Compensation up to \$465 is provided.

If you are interested and would like to see if you are eligible to take part, scan the QR code or enter the link and access code in your browser to take our brief pre-screen survey:
