ethan.w.clark@cuanschutz.edu

We are looking for participants who:

- ✓ Are between 18-80 years old
- ✓ Have been diagnosed with breast cancer
- ✓ Are being treated with endocrine therapy such as tamoxifen or an aromatase inhibitor

The study involves:

- ❖ Two visits to the Anschutz Medical Campus
- ❖ Exercise testing, glucose testing, a body composition scan, and two-weeks of free-living activity monitoring
- ❖ Compensation provided

Principal Investigators: Rebecca Scalzo, Ph.D., & Heather Leach Ph.D.
