

PROMISE

**PRenatal and Obstetric
Maternal Exposures and Islet
Autoantibodies in Early Life**

Are you an expectant parent with Type 1 Diabetes?

ELIGIBILITY

- **BABY's** mother or father has type 1 diabetes for at least 12 months, or a full sibling of the baby has type 1 diabetes.
- Mother **8-24** weeks gestation with a singleton pregnancy also willing to participate
- Parents **18** years of age or older

STUDY PROCEDURES

- Blood collected from mother and questionnaires filled out once per trimester and once after delivery
- Screen baby for genetic risk of type 1 diabetes, and have your child followed for measurement of islet autoimmunity, through 5-6 years of age
- Father is also asked to complete one visit during pregnancy
