

CU-GENES Study

The University of Colorado Genetic Engagement, Education, and Screening

The purpose of our research study is to assess satisfaction with genetic testing for hereditary cancer risk in a high-risk population in Colorado and New Mexico.

Inclusion Criteria:

- Over the age of 25
- At least one grandparent of Jewish ancestry OR be of Spanish ancestry with roots in the San Luis Valley
- No prior genetic testing
- No personal history of bone marrow transplants or blood cancers
- Currently live in Colorado OR New Mexico
- Not currently pregnant

Main Procedures:

- If you decide to undergo genetic testing and enroll in this research study, you will be asked to provide your testing results and to complete online surveys

Duration of Participation:

- Surveys will take 15-30 minutes to complete

Compensation:

- \$200 reimbursement of cost of testing
