

# PARTICIPANTS NEEDED FOR A RESEARCH STUDY ON NEUROSTIMULATION AND COGNITIVE FUNCTION

Help us understand how non-invasive stimulation of the vagus nerve affects thinking and attention.

## Participation in this study includes:

- A single 1-hour study visit
- Completion of a computerized attention task
- Non-invasive electrical stimulation of the ear
- Physiological monitoring with wearable sensors

## You may be eligible if you:

- Are 18-65 years old
- Have normal or corrected-to-normal vision
- Have no significant medical conditions

Compensation Provided
