

Patients need **new** ways to avoid **asthma attacks**

We need your help to find answers

- The **iTREAT study** will compare different guideline approved ways of treating **adults** and **teens** with asthma to see if they reduce the need for emergency care or hospital visits.
- Participation lasts for 16 months. Every other month you will answer questions about your asthma online or by telephone.

Who can join?

- ✓ Teens and adults with asthma that is not well controlled

What will happen if you join?

- ✓ Every participant will have access to online asthma symptom tracking tools to help manage asthma symptoms.
- ✓ Some participants will **be prescribed extra medicine** for their asthma.
- ✓ You will be **compensated** for your time.
