

DAWN STUDY

The purpose of this study is to understand how PTSD-related nightmares impact heart health in women.

We are looking for women who do or do not experience nightmares related to PTSD to join our research study.

Qualification:

- Women 22-40 years of age
- Do or do not experience repetitive nightmares related to PTSD
- No history of cancer, diabetes, or cardiovascular/heart disease

Interested? Complete the optional preliminary eligibility survey using the QR code

- Send a message to DAWNstudy@cuanschutz.edu if you have additional questions

Compensation will be provided

University of Colorado
Anschutz Medical Campus
