

Research about the Effects of Your Genetics on the Contraceptive Implant (Nexplanon®)

- Are you a healthy woman between the ages of **18-45**?
- Do you currently have the birth control implant (**Nexplanon®**) and have had it for the last 1 to 4 years?
- Are you interested in participating in a **research study** to better understand how genetic differences affect how well contraceptives work?

Study Involvement:

The study visit takes approximately 30 minutes.
You will complete a brief questionnaire and blood will be drawn.

Compensation, up to \$25, will be provided.

Questions? Please contact Morgan Moore at **303-545-3115** or by e-mail **Morgan.Moore@cuanschutz.edu** for more information.
